Claims 1 to 7

The inventions set forth in claims 1 to 7 are novel and involve an inventive step in relation to documents 1 and 2 cited in the international search report. In particular, documents 1 and 2 do not disclose the "convex section in which are formed runner parts for passing the molten resin from the spray to the secondary cavities." On the other hand, the inventions set forth in the present application exhibit an advantageous effect in that it is possible to reliably prevent the leakage of the molten resin as a result of the configuration in question.
